PROFESSIONAL SUMMARY

Full-Stack Developer working with React, TypeScript, Django REST Framework and PostgreSQL. At Karkhana, I build Sales, Inventory, Production, Finance and Dispatch features, from interfaces to APIs, data models, permissions and business logic. Also built Career Navigator, an AI career recommender (FastAPI, scikit-learn).

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, SQL, PHP, HTML5, CSS3
Frontend	React, Vite, React Router, Responsive UI
Backend	Django, Django REST Framework, FastAPI, Pydantic
Databases	PostgreSQL, MySQL, data modeling, migrations
APIs & Authentication	REST API design, API integration (Axios), JWT authentication, role-based permissions
AI / Machine Learning	scikit-learn: Random Forest, Nearest Neighbors, K-Means, data preprocessing
Tools	Git, GitHub, Figma

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Karkhana | Nepal 2026 – Present

- Develop full-stack features for a multi-module internal operations platform across Sales, Inventory, Production, Finance and Dispatch, using React, TypeScript, Django REST Framework and PostgreSQL.
- Design Django models, serializers, migrations and REST API endpoints and integrate them with React.
- Build inventory workflows: materials, stock, requisitions, damages, external and Common Pouch processing.
- Implement production workflows for recipes/BOMs, production jobs, material consumption, pouch and kit production, assumptions, payments and analysis.
- Develop dispatch workflows (requests, assignments, returns, delivery tracking) and role-based permissions with dashboards for each department.
- Turn Figma designs into React interfaces; debug and extend the live codebase without disrupting workflows.

SELECTED PROJECTS

Career Navigator: AI Career Recommendation Platform [GitHub](#)

Python · FastAPI · Pydantic · scikit-learn · React · Vite · Axios

- Mapped grades, skills and interests to Domain → Role → Specialization → Skill Gap → Career Roadmap.
- Trained Random Forest classifiers, a Nearest Neighbors model and K-Means clustering of student archetypes.
- Served explainable recommendations via FastAPI endpoints with Pydantic validation to a React frontend.

Inventory Management System [GitHub](#)

PHP · MySQL · HTML · CSS

- Built a MySQL-backed inventory app with login, product entry, sales, returns, stock tracking and reporting.

EDUCATION

Bachelor of Computer Applications (BCA) | Vedas College, Tribhuvan University 2021 – 2026
